Immedia Sling
MULTIFUNCTIONAL TRANSFER AID

The Immedia Sling is a multifunctional transfer aid that can be used in several situations.

Immedia Sling with handles acts as an extension of the arms, allowing the caregiver to offer support and assistance whilst maintaining a good ergonomic position and grip, without encroaching on the user’s personal space.

Sling is a flexible tool that can be used to support many different transfers such as, moving higher up in bed, transfer between sitting positions, etc.

Immedia Sling has 4 handles on each side and a non-slip material on the inside to secure the user during the transfer. The outside has a low friction surface to aid transfer and removal.
### INTENDED USE

- Support moving higher up in bed
- Support transfer between bed, wheelchair, chair, etc
- Support stand up / sit down
- Moving back / forward in chair / wheelchair

### TIP!

When two caregivers are working together one should always give a precise command when to push or pull.
